### DETAILED ACTION

Claims 63-65, 70-73 and 78-80 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 13 filed on June 03, 2002. Claims 55-58 were elected which were readable on fig. 18. Claims 55-58 and fig. 18, at the time the election was made, do not include the recess elements.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 55-58, 66-69, 74-77, 81, 82 are rejected under 35 U.S.C. 102 (b) as being anticipated by Swedish publication SE 8202 375-5.

Swedish publication shows in fig. 2 an elongated connector/track having a base (3), projection (5) extending vertically from the base to a first height and consists of identical right and left halves (5, 5). The top portion of each half includes identical extensions wherein the combined width of the extensions is less than the width of the base. The extensions include at least one angled portion (12) obliquely sloped. The projection extends the entire length of the connector as shown in fig. 1. Two protrusions (11) extending vertically from the base to a second height, which is substantially smaller than the first height, and extend the entire length of the connector shown in fig. 1. The

Art Unit: 3637

protrusions spaced apart from the projection, and being located on either side of the projection beyond the lateral extent of the extensions. The protrusions each includes tapered surfaces (14, 15) extending outwardly from a top portion of the protrusions.

Alternatively, claims 67, 69 and 82 can be rejected as follows:

Claims 67, 69 and 82 are rejected under 35 U.S.C. 103(a) as being unpatentable over Swedish publication as applied to claims 66, 68 and 81 above, and further in view of Howorth. The Swedish publication shows the protrusions (11) having at least one tapered surface (15) and the other surface (14) is not clearly shown as being tapered. In case applicant argues that 14 is not a tapered surface, then the Swedish publication does not show the protrusions with tapered surfaces. Howorth shows a connector (36) having protrusions (39, 44) having tapered surfaces (fig. 9) to provide better support and better mating surfaces to the panel (24). Therefore, it would have been obvious to one skilled in the art to modify the connector of the Swedish publication to include protrusions with tapered surfaces as taught by Howorth to provide better support and better mating surfaces to the panel.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 3637

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 55-58, 66-69, 74-77, 81, 82 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 20, 24, 25, 27, 63-66 of copending Application No. 10/265,900. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the instant application are a subcombination of the claims of the copending application 10/265,900.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim 55-58, 66-69, 74-77, 81, 82 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3, 8-11 of U.S. Patent No. 6,449,918. Although the conflicting claims are not identical, they are not patentably distinct from each other because the scope of claims is the same.

Applicant's arguments with respect to claim 55-58, 66-69, 74-77, 81, 82 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3637

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
